

Health Care Reimbursement Account (HCA)

Under the Flexible Spending Account (FSA) is the Health Care Reimbursement Account (HCA). This program allows you to take money out of your paycheck on a pre-tax basis, which you can use for all of your out of pocket health care expenses. Since the money you choose to put into these accounts is not considered taxable income, you save by paying less Federal, State and FICA taxes. You could save between \$15.65 and \$46.65 on every \$100 you choose to defer into these accounts.

Your employer determines the minimum and maximum amounts that can be contributed to these accounts. Once you conservatively estimate how much money you expect to spend on out-of-pocket health care expenses for the year you divide your total election by the number of pay periods. This amount will show you how much will be deducted from your paycheck each pay period. Since the HCA is a pre-funded account, the full amount of the annual election is available to you starting the first day of the plan and is available at all times during the plan year while you are employed.

Please keep in mind!

- You can enroll in an HCA even if you are not participating in your Employer’s medical plan.
- Monies in your HCA are available to be used for your legal tax dependents.
- The full amount of your annual election is available on the first day of the plan!
- Once an annual election is made you’re locked in. Changes can only occur under certain qualifying IRS events
- You must estimate conservatively, any unused monies are forfeited to your employer.
